

HPE Aruba Networking 750 Series Campus Access Points

Startup Guide

**Hewlett Packard
Enterprise**

HPE Aruba Networking 750 Series Campus Access Points support the 802.11be standard in the 2.4 GHz, 5 GHz, and 6 GHz bands with a 4x4 MIMO tri-radio Wi-Fi 7 platform. Additionally, the 750 Series provides dual wired 10 Gbps Smart Rate Ethernet network interfaces that enhance their performance and client capacity.

Package Contents

One of the following configurations:

- (1) AP-754 or (1) AP-755 Access Point
- (5) AP-755 Access Points and (1) Console Adapter Cable

Inform your supplier if there are any incorrect, missing or damaged parts. To return this product, repack this unit and or other included materials into the original packaging before returning it to the supplier.

Regulatory Compliance

General Regulatory Statements

This product complies with the regulatory rules that apply in the country it is configured for. In most countries this product may not be allowed to enable all radios and all channels, and various restrictions may apply. HPE Aruba Networking will continue to upgrade the software and regulatory restrictions that apply to this product to remain in compliance with the latest regulatory rules in the country of operation, and we will strive to ensure that the capabilities of the product are maximized for each country.

However, this does not imply a commitment to enable all radios in all countries where we ship the product, and/or all deployment scenarios (for example, indoor or outdoor) that the product gets configured for. Please consult your HPE Aruba Networking representative to confirm the latest regulatory status for the product in the country of operation and any anticipated future enhancements or other changes, as well as check the regulatory rules via the host country's regulatory agencies for more information.

HPE Aruba Networking access points are classified as radio transmission devices, and are subject to government regulations of the host country. The network administrator(s) is/are responsible for ensuring that this device operates in accordance with all local/regional laws of the host domain. Access points must use channel assignments appropriate to the domain in which the access point is deployed.

Compliance with Latest Regulatory Specifications

An upgrade to the latest available version of the AP firmware and/or downloadable regulatory table (DRT) is recommended. This ensures that the AP supports the most up-to-date set of countries and regulatory specifications.

For a complete list of approved devices for your country domain, refer to the *HPE Aruba Networking Downloadable Regulatory Table Release Note* by scanning the QR code in this section, or visiting:

www.arubanetworks.com/techdocs/DRT/Default.htm.

Regulatory Model Numbers

The regulatory model numbers (RMN) for the HPE Aruba Networking 750 Series are:

- AP-754 RMN: APIN0754
- AP-755 RMN: APIN0755

802.11be operations must be switched off in countries that don't currently allow 802.11be and it is up to the installer to comply with this legal requirement.

Brazil

Este equipamento não tem direito à proteção contra interferência prejudicial e não pode causar interferência em sistema devidamente autorizados.

O uso deste equipamento é restrito a ambientes fechados e proibido em plataformas petrolíferas, carros, trens, embarcações e no interior de aeronaves abaixo de 3.048 m (10.000 pés).

La operación de este equipo está sujeta a las siguientes dos condiciones: (1) es posible que este equipo o dispositivo no cause interferencia perjudicial y (2) este equipo o dispositivo debe aceptar cualquier interferencia, incluyendo la que pueda causar su operación no deseada.

United States

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit that is different from that to which the receiver is connected.
- Consult the dealer or an experienced radio or television technician for help.

Improper termination of access points installed in the United States configured to a non-US model controller is a violation of the FCC grant of equipment authorization. Any such willful or intentional violation may result in a requirement by the FCC for immediate termination of operation and may be subject to forfeiture (47 CFR 1.80).

Changes or modifications to this unit not expressly approved by HPE Aruba Networking can void the user's authority to operate this equipment.

For additional safety and regulatory information about this product, refer to the *750 Series Installation Guide*.
