

HPE Aruba Networking CX 4100i Switch Series

What's new

- Ruggedized Layer 2 switch series provides high performance, fully manageable, and reliable, Ethernet connectivity to IoT, access points, and user devices in harsh environments.
- Versatile form factors with fast 1/10GbE uplinks deliver both 30W and 60W PoE to improve IoT power.
- Layer 2 feature set with static routing and no switch software licensing required.
- Aruba Dynamic Segmentation [1] enables enhanced security and simplified access for users and IoT.
- Management flexibility with support for Aruba Central, easy-to-use Web GUI, CLI,

Overview

The Aruba CX 4100i Switch Series is a modern family of ruggedized Ethernet switches ideal for connecting IoT, access points, and user devices in harsh environments. Created for high performance, reliable, and access with enhanced security, the Aruba CX 4100i switches provide versatile deployment options for enterprise networks extending beyond carpeted areas to challenging outdoor and industrial spaces.

Based on the programmable AOS-CX operating system used across the Aruba CX portfolio, this IP30 ruggedized series helps deliver a more consistent, more efficient operator experience. This Layer 2 series has convenient built-in high speed uplinks, supports both 30W and 60W PoE, and is ready for deployment with fan less 12 port DIN mount and 24 port 1U rack mount models. With robust QoS, support for static routing, and IPv6, the Aruba CX 4100i also simplifies ownership with no switch software licensing requirements.

and Aruba NetEdit.

Features

Ruggedized Aruba CX Switches

The Aruba CX 4100i Switch Series provides IP30 Ethernet connectivity with high speed uplinks, 30W and 60W PoE, to securely extend the enterprise network and support IoT in harsh environments.

Using Aruba AOS-CX operating system across Aruba CX switching platforms and deployment domains provides a simpler, more consistent operator experience.

Achieve versatile deployment with fan less 12 port DIN rail mount and 24 port 1U rack mount models with built-in 1/10GbE uplinks and up to 360W Class 4 and Class 6 PoE.

Fully-managed enterprise class switches deliver Layer 2 capabilities with support for static routing, ACLs, robust QoS, traffic prioritization, and IPv6 support.

Simplifies ownership with no switch software licensing or subscriptions required.

Performance and Power

The Aruba CX 4100i Switch Series is designed with Aruba ASICs that deliver very low latency, increased packet buffering, and adaptive power consumption.

Deploy IoT devices and wireless access points in harsh environments with models that support up to 360W IEEE 802.3at Class 4 and IEEE 802.3bt Class 6 Power over Ethernet.

Built-in wire speed 1/10GbE uplinks remove bottlenecks at the access layer where devices connect.

Operational in extended temperatures from -40oC to 70oC using Aruba's industrial transceivers.

Simplified Configuration and Management

The Aruba CX 4100i Switch Series provides flexibility to manage and simplify configurations with Aruba NetEdit, easy to use built-in web GUI, or industry standard CLI.

Aruba NetEdit introduces automation that allows for rapid network-wide changes and verifies policy conformance post network updates.

Software-defined ready with REST APIs for fine-grained programmability of network tasks.

Smarter Segmentation

The Aruba CX 4100i Switch Series supports Aruba Dynamic Segmentation that automatically applies and enforces user, device, and application-aware policies on Aruba wired and wireless infrastructures.

Automated device profiling, role-based access control, and Layer 7 firewall features deliver enhanced visibility and performance for a better overall experience for both IT and end-users alike.

Reduces time-consuming and error-prone task of adds, moves and changes.

Technical specifications

HPE Aruba Networking CX 4100i Switch Series

Management features

Management flexibility with support for Aruba Central, easy-to-use Web GUI, CLI, and Aruba NetEdit.

Note: Central support in a future-release of Aruba Central.

[1] User Based Tunneling (UBT) and Local User Roles (LUR) supported.

HPE Aruba Networking Services

HPE Aruba Networking services simplify and accelerate the network technology lifecycle, enabling your network to scale with better predictability and cost-effectiveness. Whether you operate your own network and need to improve your IT efficiencies, or you want to offload some of the burden, we have the services you need to reach your goals.

Learn more about what HPE Services - Aruba Networking has to offer at: arubanetworks.com/services/

Support Services

Our support portfolio provides the essential support elements as well as proactive and preventive features to help you improve your team's productivity and get the most from your network. Our support customers benefit from faster issue resolution, simplified operations and efficiencies, and reduced network issues.

Professional Services

With deep intellectual capital and purpose-built tools, our team delivers a range of standard and custom professional services designed to accelerate your value from HPE Aruba Networking technology.

Project based services include: Annual subscription services include:

- Planning, audit, and assessment
- Architecture review and design
- Deployment, migration, and knowledge transfer
- Network optimization
- Intelligent Operations
- Customer Experience Management

Our [Education Services](#) allow your team to come up to speed quickly.

HPE GreenLake for Networking

Our NaaS solution, HPE Aruba Networking Managed Connectivity services, part of the HPE GreenLake services family, simplifies network operations, accelerates equipment handling, and increases the value of your HPE Aruba Networking network. If you need expert guidance and automation-based operations for your team, please explore the NaaS approach from HPE Aruba Networking [here](#).
